

## Critical Compromise Mitigation Worksheet

- As soon** as possible, disconnect network access to the device by unplugging it from the wall or contacting the NOC at (540)231-6780.
  
- Identify accounts** that have been accessed from this machine. Was sensitive data accessible from the accounts? Have all users who have used the affected machine change ALL of their account passwords on a separate machine.
  
- Run the Find\_SSN tool** on the machine to ensure that the device does not contain any sensitive data. If the device does contain sensitive data please notify the IT Security Office.
  
- Reformat all drives** in the computer and reinstall the operating system.
  
- Notify** Information Technology Security Office that the mitigation is complete
